DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 24-26, 30-31, and 33, drawn to a communication system that generates a notification at the completion of data reception according to the amount of data received, classified in class 455, subclass 412.
 - II. Claims 15-23, 27-29, 32, and 34, drawn to a communication system that generates a notification at the completion of data reception according to the a time period for receiving the data, classified in class 455, subclass 405.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a communication system that generates a notification at the completion of data reception according to the a time period for receiving the data. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matters and different searches are required for each group.

Art Unit: 2685

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
